

## CHARGING INSTRUCTIONS

1. Insert the Kozhya Air DC adapter\*) USB Type A cable into a USB power plug with at least 2000mA current rating (any recent mobile phone Samsung or Apple charger is rated for this capacity).

2. Plug in the 3.5mm jack into Kozhya Air device DC charging port (c).

3. Let Kozhya Air charge to full capacity for at least 50 minutes.

The blue led light near button (a) will blink during charging.

4. When the led light is steady then charging is complete. You can now disconnect the plug and start using your Kozhya Air.

\*) Use only Kozhya products and accessories to ensure maximum quality of the product experience.

## CLEANING INSTRUCTIONS

STEP 1. Remove cap from top of your Kozhya Air and fill half-full with water.

STEP 2. Return cap to close.

STEP 3. Turn on your Kozhya Air and let it run until the water is gone. The sound and pressure will change once the water has run out.

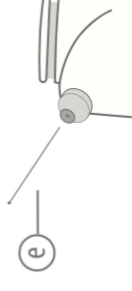

STEP 4. Open the top cap and dry with a cotton swab to ensure there is no moisture left. This will help to avoid bacterial growth.

## TROUBLE SHOOTING

**Spray doesn't come out = clogging**

Solution:

- try opening the nozzle to maximum flow following STEP 4, or
- clean the nozzle with needle kit (e).

**Charging is erratic, or led blinks abnormally**

Solution:

Use a USB Adapter with at least 2000mA (2A) rated current, as the adapter capacity influences the charging cycles and is not adequate to the minimum requirements.
